

Log on to your ABC installation safely through the internet, with the Multi Communication Module (MCM).

Log onto your ABC processor all around the world, with the MCM module. Using the personal code you can connect to your ABC processor with the web browser. On the screen of your tablet or smartphone you will receive the same information as displayed on your ABC touchscreen. All of the features can be operated in the same way. All data is already registered onto the PC, including who, when and how long was logged in.

Example of a screen that will become visible on your **tablet**, smartphone with the MCM:

Extra buttons at the top and the bottom of the screen:

Logout:

Forced shut down. You will be logged out automatically when the MCM module has not been active for a preset period of time.

Return from 'Graphic' to the screen.

Graphics preprogrammed by you. You can prepare them using the ABC PCsoftware.

this is a graphic that can be requested be choosing an available item at that moment.

Chat feature is used to send text messages to the base and to all logged in users who have that setting.
